

E-Packing Slip: Streamlining Inventory Data Exchange from IRT Systems to Vestigo®

What is the E-Packing Slip?

The E-Packing Slip is a downloadable file from the IRT that provides inventory details of a shipment, facilitating electronic communication between the sponsor and the site.

How Does the Process Work?

Rather than manually entering shipment information into Vestigo®, the E-Packing Slip is uploaded to automatically populate shipment and IP details into Vestigo®.

How the Process Works

1

Physical Shipment

- Receive and unpack shipment.
- Match Physical contents to the paper packing slip.

2

IRT

- Log in to the IRT system to register and acknowledge shipment.
- Download new universal packing slip file with IP inventory details.

3

Vestigo®

- Import file via new tool.
- Shipment/IP inventory details automatically populate.
- Align, view, and confirm detailed shipment data.

Who will use the E-Packing Slip?

A clinical trial site receiving an IP shipment on a participating protocol.

What are the benefits of the E-Packing Slip?

- Aligns shipment contents and IP details between the IRT and Vestigo®.
- Reduces time and transcription errors by eliminating manual data entry during the receive process.
- Provides an industry-wide data specification supporting standardization, accuracy, efficiency, and improved site satisfaction.

**Everyone can play a role in
supporting the standardization of
the E-Packing Slip on all protocols.**

E-Packing Slip: Streamlining Inventory Data Exchange from IRT Systems to Vestigo®

For Clinical Trial Sites:

Is this available on all protocols? How will I know if it's available?

Not yet. The E-Packing Slip is currently available on select protocols utilizing the Sitero (Ramos) IRT platform.

You may receive an e-mail notification from McCreadie Group if your site is listed as participating in one of these protocols.

Check IRT User Guides or inquire with your CRA.

How can my site participate?

Sites can participate by supporting the initiative to make the E-Packing Slip a clinical trial standard on all protocols.

Spread the word.... Talk to your CRA or sponsor-contact during SIVs or routine IMVs, inquire about availability, highlight the benefits, and share this document.

For Sponsors, CROs & IRTs:

How is the E-Packing Slip feature made available?

The E-Packing Slip feature and file is built into the IRT system and can then be available to any protocols using that platform.

What can I do to adopt the E-Packing Slip on one of my protocols?

Discuss the benefits of the E-Packing Slip with your clinical solutions providers.

Request and advocate for the E-Packing Slip feature to be built from IRT suppliers and incorporated into clinical trial supply standards.

Include instructions for using the E-Packing Slip in Pharmacy Manuals and IRT User Guides.

Scan the QR code to download the file specification.
